# The Remote Metamorphic Engine

- Security as undefined expression
- Flux binary mutation
- Resisting Reverse Engineering
- Evading AI machine learning
- Artificial Immunity

# Security Patterns

Division by Zero | Division by Infinity

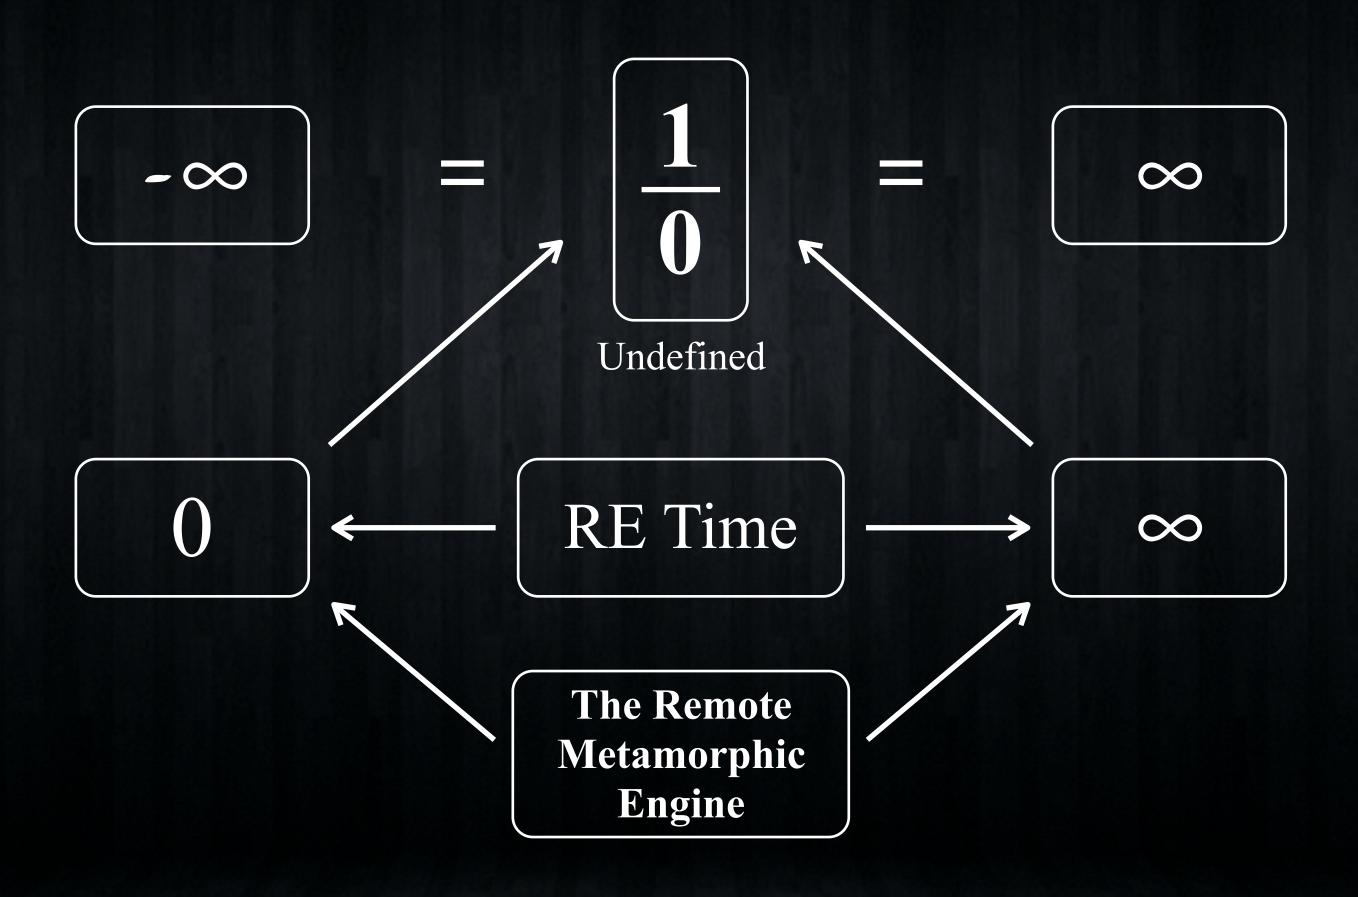

Isolation

Randomization

# The Undefined Expression

Security as Undefined & indeterminate expression

### The Unbreakable Code

Unpredictable un·pre·dict·a·ble adjective:/ anprə diktəb(ə)l/

Likely to change suddenly and without reason and therefore not able to be predicted (= expected before it happens)

#### The Breakable Code

The Fixed Static Code Problem

Static Code Dynamic Data

Core security weakness in all today's software

Enables all sorts of replicable software security exploits

# Unpredictable Code Evolution

Dynamic Code Dynamic Data

Code evolution across time
Functionality evolution across location
Self contained autonomous code
Unpredictable
Self aware

# Code Evolution

Resisting Reverse Engineering

Locate the Code

Remote Execution \ \ \ not locatable

Analyze the Code

Short Lifetime J. Flux Mutation

Break the Code

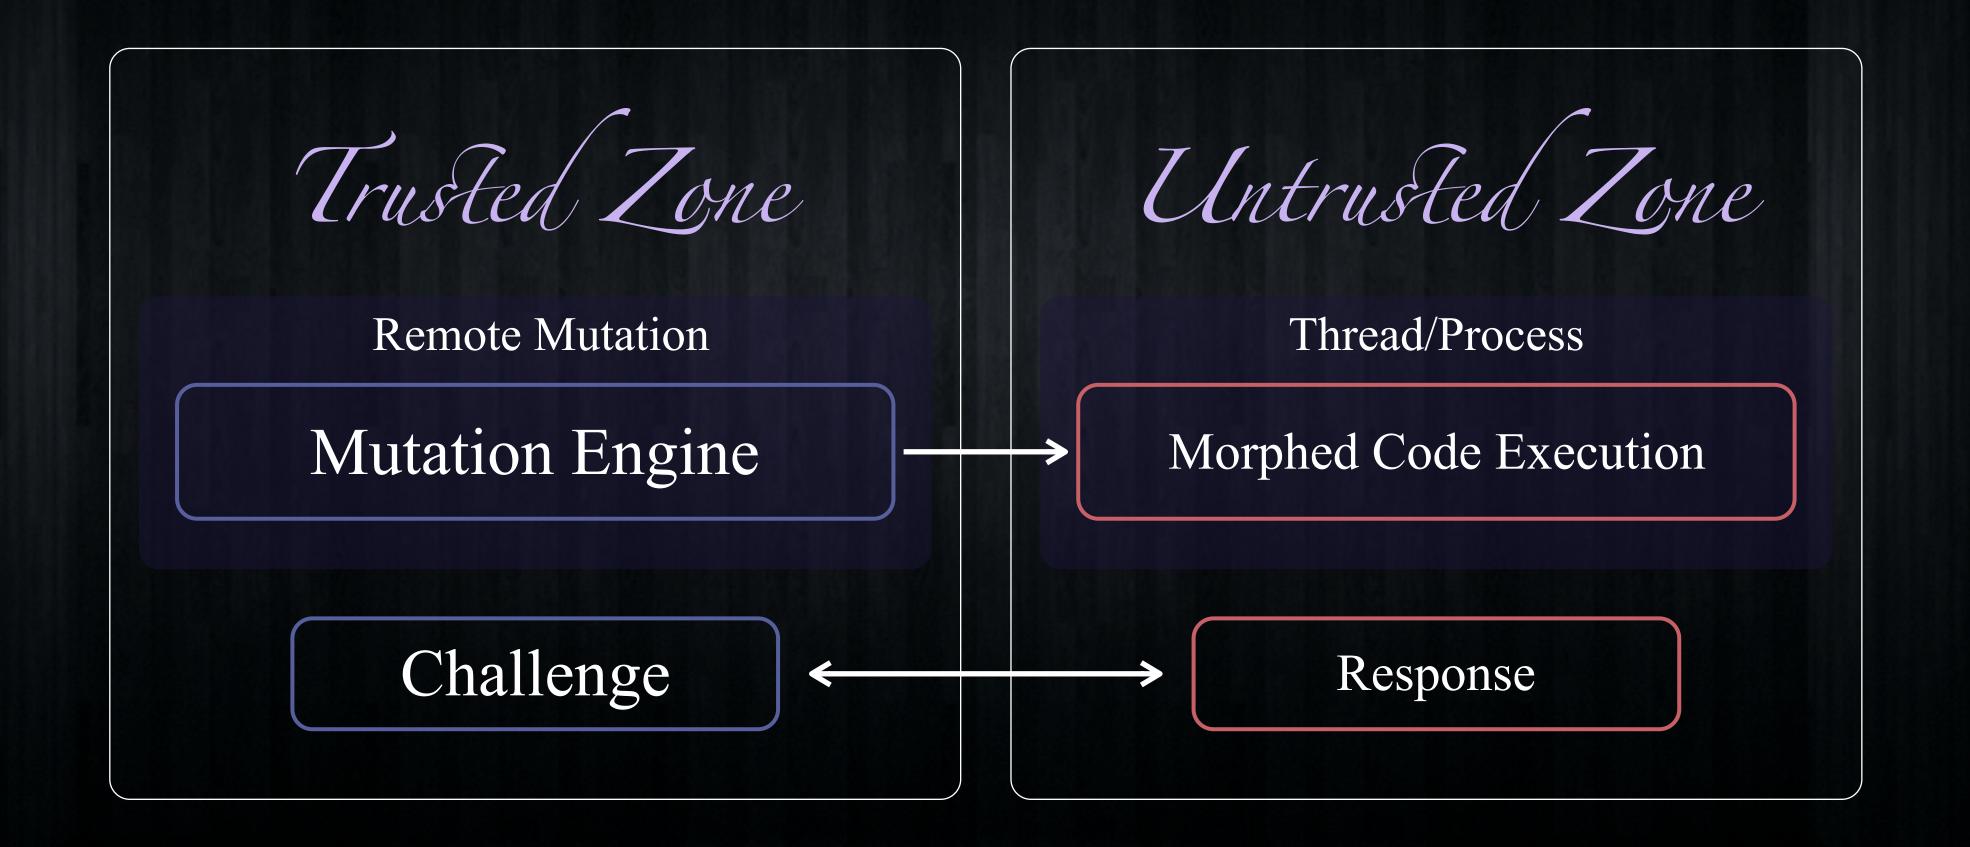

Self aware

## The Remote Metamorphic Engine

#### Remote Flux Mutation

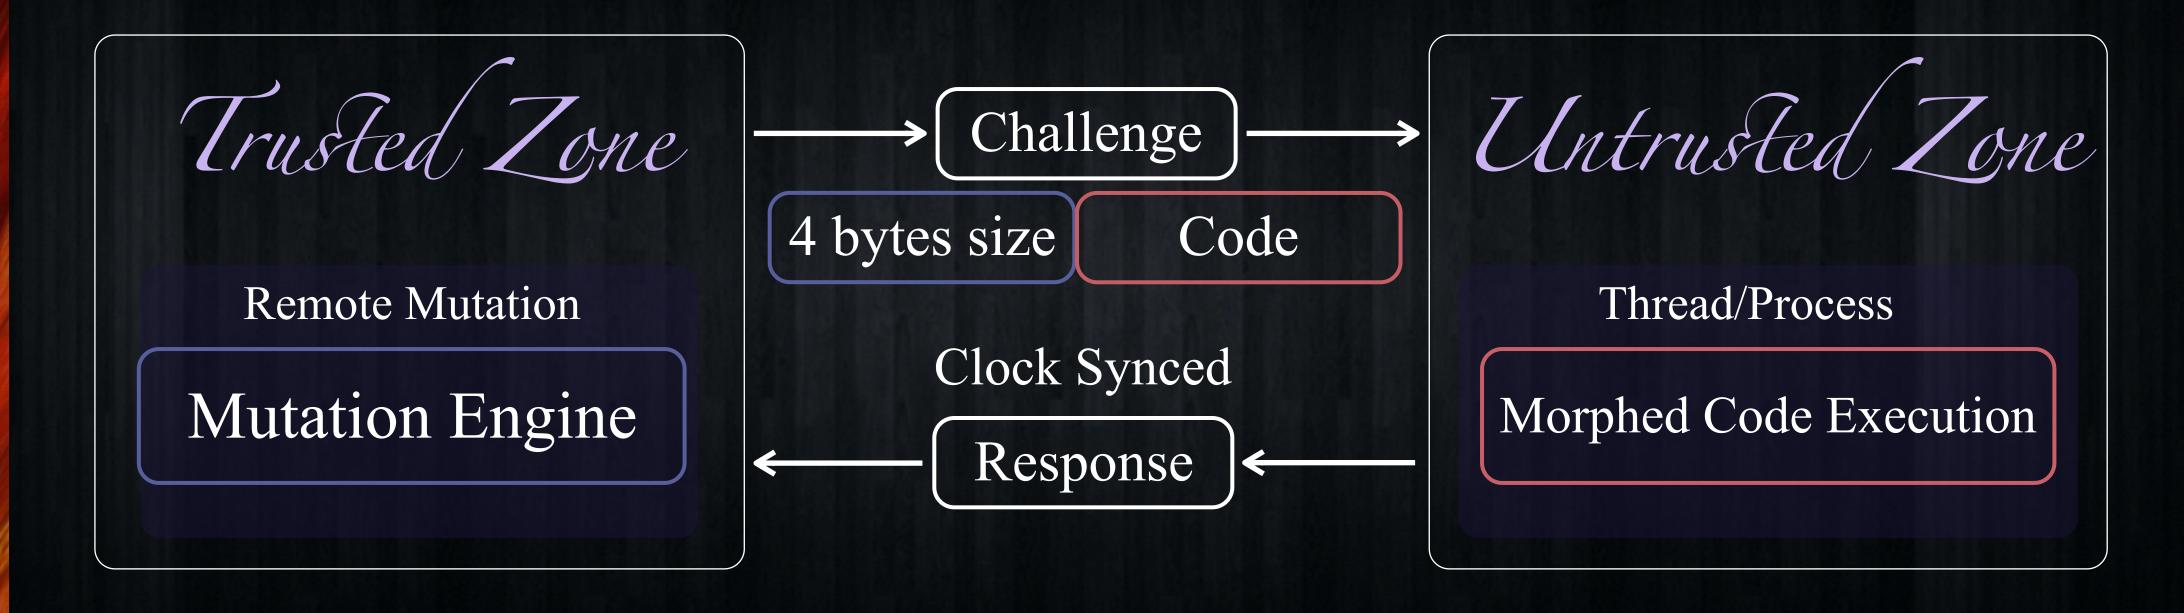

# Why Remote?

## The Remote Metamorphic Engine

Challenge Response Metamorphic Protocol

Communication protocol made of morphed clock synchronized machine code rather than data

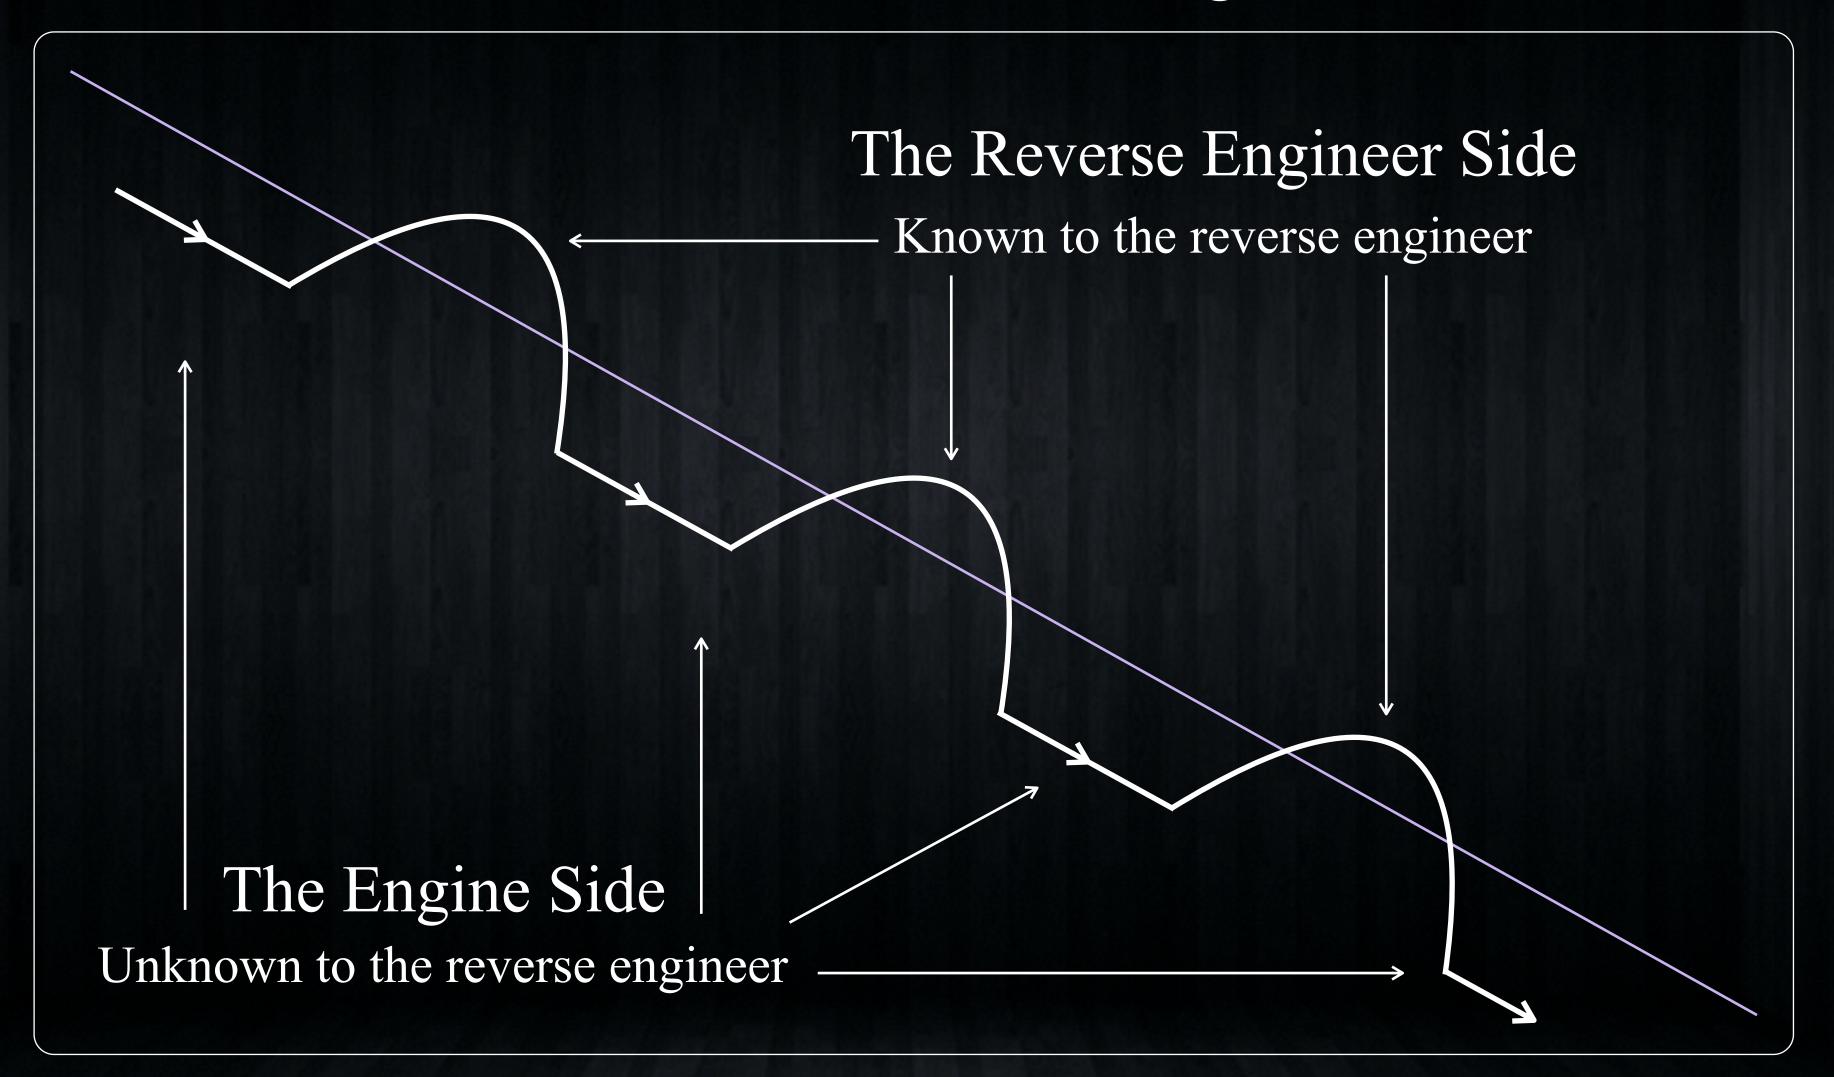

# Why Metamorphic?

### The Remote Metamorphic Engine

#### Remote Code Slicing

# Demo 1

# Mutation Engines

AV Signature Evasion

#### Polymorphic Engines

morphed body encryption

## Metamorphic Engines

body polymorphic

# Signature Evasion

Morphing Techniques Evading Signature

Instruction reordering

Code Permutation

Subroutine permutation

Instruction Substitution

Subroutine Inlining

Dead Code Insertion

Subroutine Outlining

Changing Control Flow

Expansion

Transposition

Can not resist reverse engineering

#### Flux Mutation Goals

Extend Trust

Ensure Trusted Remote Execution

Evade Signature

Evade AI Machine Learning

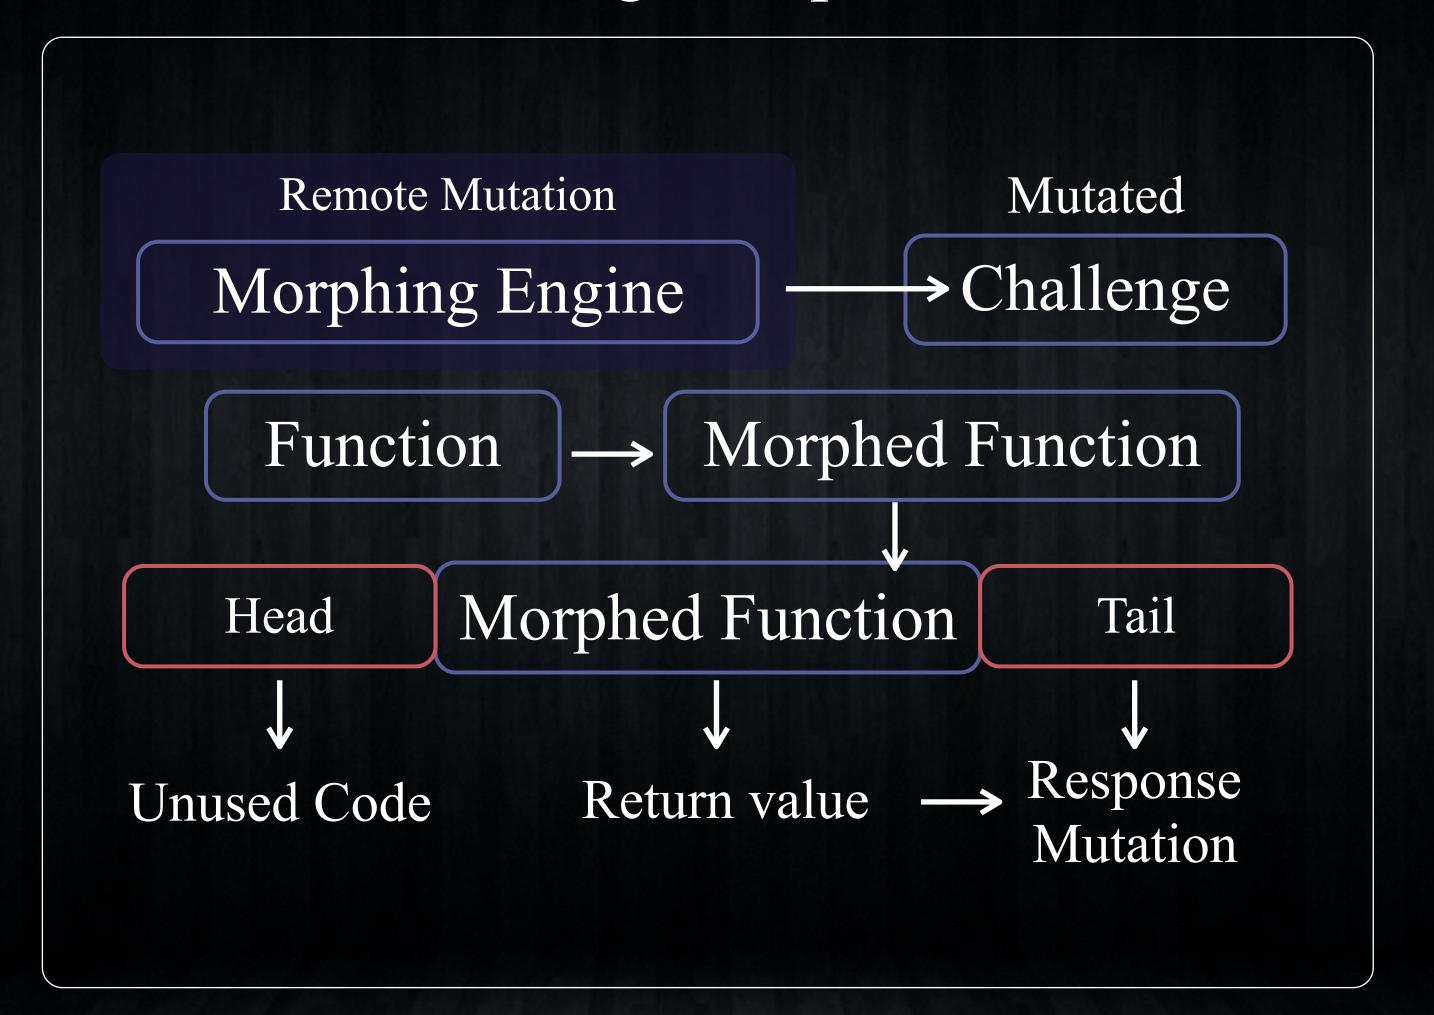

Detect & Evade RE

Detect Tampering Attempts

# Trusted Mutation

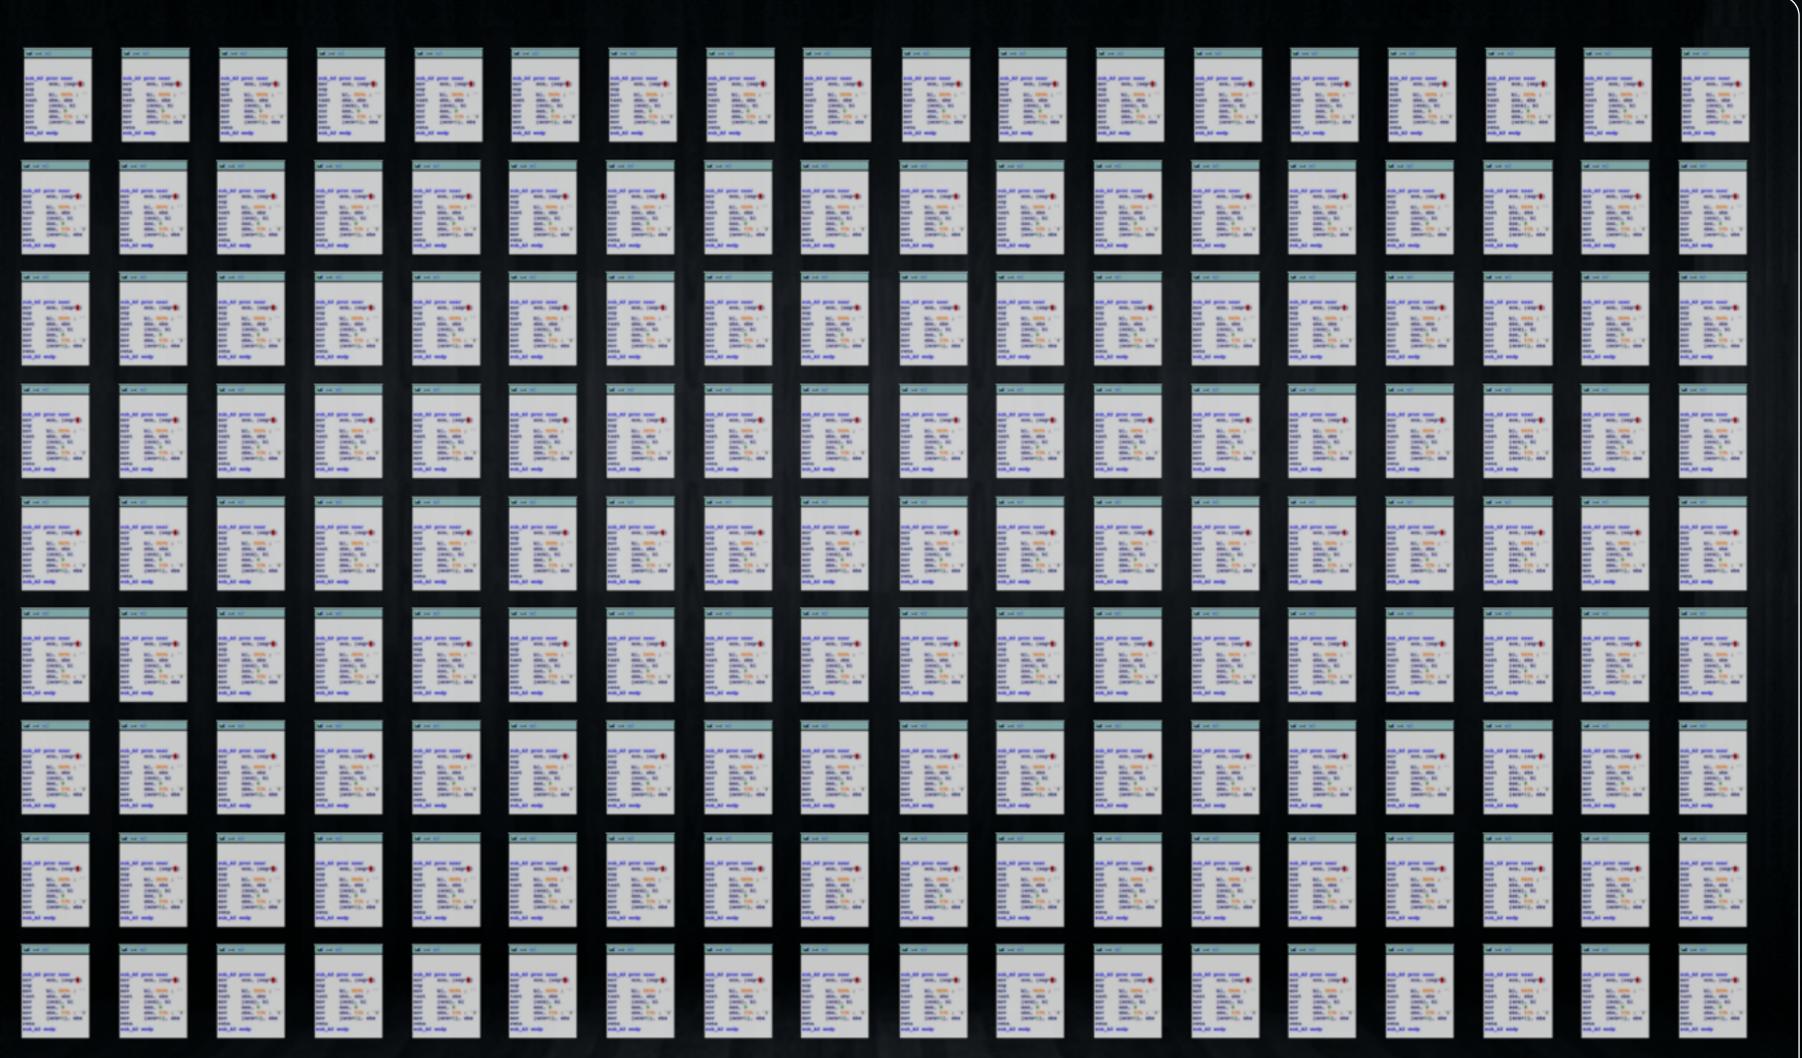

#### Trusted Challenge Response Mutation

## Structure Obfuscation

All functions look the same before and during execution

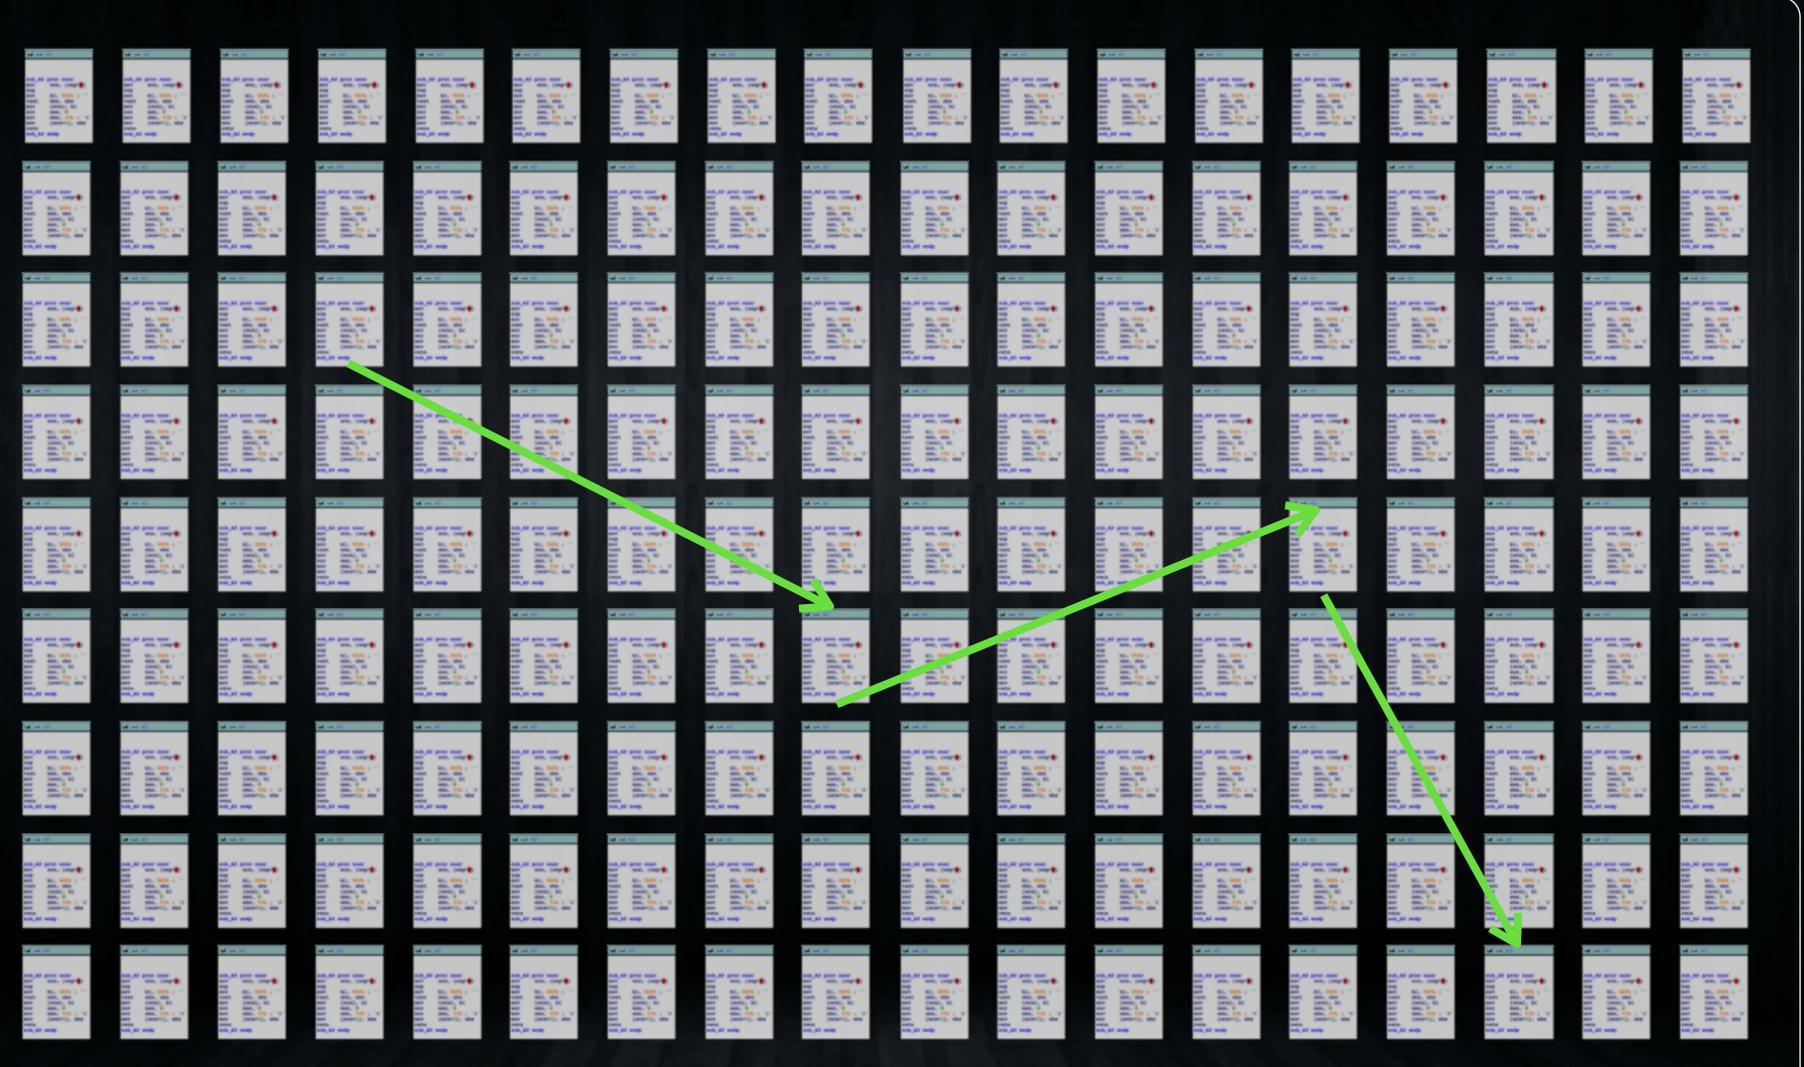

## Structure Obfuscation

#### Self modifying basic block Edges

# Demo 2

### RE Evasion

#### Morphing Techniques

Metamorphic + Polymorphic

Self modifying mutation

Code structure obfuscation

Clock synchronized execution

Challenge-Response Mutation

Functionality Mutation

Decoupled Reversible Mutation

Slices Permutation

Code size magnification
